

Identity & Access Management

Setting up IAM roles and policies in a cloud provider (Azure).

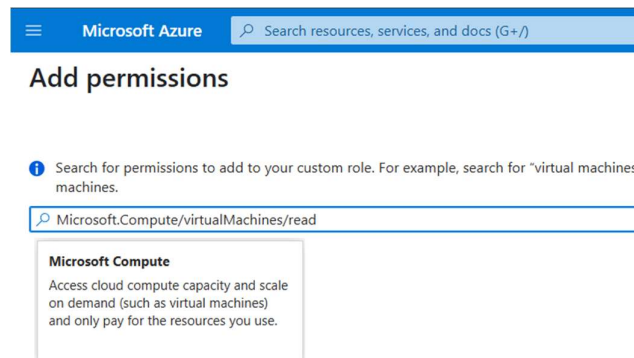

1. Open Access control (IAM) Pannel.

2. Click on Custom Role.

3. Adding Reading Permission.

Fill necessary information and create the role.

Assigning Role

1. Select the Role

Microsoft Azure

Search resources, services, and docs (G+)

Add permissions

i Search for permissions to add to your custom role. For example, search for "virtual machines machines."

Microsoft.Compute/virtualMachines/read

Microsoft Compute
Access cloud compute capacity and scale on demand (such as virtual machines) and only pay for the resources you use.

2. Select the Member

Add role assignment
